### Inventory Services

We collate a detailed report showing the condition and contents of a residential property.

It is important for the inventory to be thorough and use pictures and/or video to record the exact condition of the property and its contents. The inventory will form part of the contract between the tenant and landlord, and is an essential document when it comes to deposit disputes.

An inventory should be completed pre check in and / or pre check out stage to record the condition of the property (and its contents) at the start and end of a tenancy

To find out more about how tenantSERVE can help you to tick all your tenancy requirements, call us for a friendly chat on:
